

Agenda Item Number 10.C.

Amendment to the FY03 Unified Planning Workprogram

Presenter: Tom Schwetz

Action Recommended: Amend the FY03 Unified Planning Work Program (UPWP)

Issue Summary:

The FY03 Unified Planning Work Program (UPWP) is a federally required certification document describing the transportation planning activities to be undertaken in and surrounding the Eugene-Springfield metropolitan area from July 1, 2002, to June 30, 2003. Development of the UPWP provides local agencies participating in the transportation planning process with an opportunity to identify transportation planning needs, objectives and products.

The LCOG Board adopted the FY03 UPWP at its April 25, 2002 meeting. ODOT has requested that the UPWP be amended to better reflect the prospective nature of some of the funding and related tasks. Specifically, the amendment moves prospective projects for which funding is not yet secured to an appendix. Those projects include:

1. Planning/technical assistance for Region 2 of the Oregon Department of Transportation (ODOT) involving services and/or products as part of ongoing highway facility planning projects in FY03; and
2. TCSP Funding for Phase II of Region 2050.
